

Noor Mohammad

Software Engineer · Dhaka, Bangladesh

noor.jsdivs@gmail.com · noormohammad.dev · github.com/noorjsdivs

PROFILE

Software engineer in Dhaka building scalable web and mobile apps with React, Next.js, React Native, and the MERN stack — storefront, admin, API, and mobile — and teaching the work in public through YouTube and ReactBD.

EXPERIENCE

Software Engineer, Arogga Limited

2023–Present

Shipping production web and mobile surfaces on the MERN stack.

CTO & Founder, ReactBD Limited

2021–Present

Studio and classroom: the architecture I ship is the architecture I teach.

MERN, Toptal

2021–Present

Product engineering for remote teams across commerce, admin, and mobile.

Content creator, Buy Me a Coffee

2023–Present

Tutorials and extras that include the unglamorous production parts.

Independent full-stack

2017–2021

React products for clients who needed the whole surface, not a demo.

FOCUS

Next.js, TypeScript, React, React Native, Expo, Node.js, MongoDB, Sanity, Tailwind CSS, Express

SELECTED WORK

Northline

Ceramics marketplace with a real ops desk — one catalog, three surfaces.

Hearth

Neighborhood food ordering. Menu as content; tickets a cook can read.

Fieldkit

React Native for people who work away from a desk. Offline-tolerant.

Lumen

ReactBD course platform. Syllabus as architecture, Sanity as source.
